## **MEDICAL KITS**

### **PR1/PR2 AND DL TEAMS ONLY**

Each team is given a medical kit when team equipment is picked up. The medical kit will be stocked with emergency supplies such as instant ice bags, tape, bandaids, tensor bandages etc. There will be a second restocking during in mid-June for those who require additional supplies.

Please remember that the medical kit is for emergencies. If you have players with chronic injuries that require icing after each game, or at every half time, we ask that you bring a small cooler of ice. If you have players who have chronic injuries that require taping every game and practice, we ask that you have them supply their own tape.

If you require items not supplied in the med kit, your team will be responsible for purchasing those items.
